Company Profile

Nirvik Technologies Ltd. | Document NT-GEN-001 | Effective 1 July 2026

About Nirvik

Nirvik Technologies Ltd. is a software product and engineering services company founded in 2014 and headquartered in Dhaka, Bangladesh. We have around 320 employees, of whom about 240 are in engineering roles. Our mission is to build dependable software that makes everyday services in South and East Asia simpler, faster and fairer.

Offices

- **Dhaka (Headquarters):** Level 9, Tejgaon Tech Tower, Tejgaon I/A, Dhaka 1208.
- **Chattogram Development Centre:** Agrabad, Chattogram. Mainly QA and mobile teams.
- **Tokyo Liaison Office:** client relationship and pre-sales for Japanese customers. No engineering staff.

Products and business lines

- **NirvikPay** - a payment gateway and merchant dashboard used by over 4,000 merchants in Bangladesh.
- **MediTrack** - a cloud hospital management system (patient records, billing, pharmacy) used by 60+ clinics.
- **Nirvik Labs** - our applied AI team building document intelligence, chatbots and RAG-based assistants for internal products and clients.
- **Engineering Services** - dedicated offshore teams for clients in Japan and the European Union (about 45% of revenue).

Our values

- **Ownership** - we take responsibility for outcomes, not just tasks.
- **Clarity** - we write things down and communicate plainly.
- **Craft** - we care about quality, testing and maintainable code.
- **Respect** - we treat colleagues, clients and candidates fairly and kindly.

Work model

Nirvik follows a **hybrid work model: 3 days per week in the office** and 2 days remote. Teams agree on their own office days. The workweek is Sunday to Thursday, and **core collaboration hours are 10:00 to 16:00 (Bangladesh Standard Time)**. Fully remote roles are not offered, except for approved senior specialists. English is the working language for all documentation and client communication. Japanese language ability (JLPT N3 or above) is a plus for engineers on Japan-facing teams, but it is never a mandatory requirement.
